Subject: Sellout to MSN is poison!

Inovators and creative small startups are only fodder for the rapacious robber barons, Bill Gates and Ballmer. Sellout by the DOJ is defined as good. My opinion matters little when our Attorney General with the blessings of our Pres.& VP of our USA, allow this monster to grow tennacles, rob and rape. These are powerful wealthy men wielding influence and power employing their ill-gotten goods to litigate! In an effort to control confidential data and communication via eNet is poison. This is dangerous territory! Will we stand by and watch this happen right under our nose? With impunity, they squeeze and blackmail until they win. Our monopoly laws are a farce only proven in this MSN case!! If we allow this to continue, we deserve it. What a big business disappointment with our present administration. mal
